

COLLEGE OF MINES AND EARTH SCIENCES

Find out
more

MORE CAREERS MORE OPPORTUNITIES MORE IMPACT

Atmospheric Sciences

Starting salaries for Atmospheric Scientists can range from \$50,000-\$150,000 per year!

Atmospheric Scientists can choose from diverse career opportunities including:

- Astronaut
- Air Quality Scientist
- Climate Change Analyst
- Educator
- Environmental Analyst
- Snow and Hydrology Scientist
- Meteorologist

Geology & Geophysics

Starting salaries for Geoscientists can range from \$40,000-\$120,000 per year!

Geoscientists have career opportunities in many different fields including:

- Geological Engineer
- Environmental Geologist
- Earth Science Teacher
- Petroleum Geologist
- Seismologist
- Paleontologist
- Geophysicist
- Hydrologist
- Mineralogist

Metallurgical Engineering

Starting salaries for Metallurgical Engineers can range from \$56,000-\$110,000 per year!

Metallurgical engineers have many different industries to work for after graduation, including:

- Aerospace
- Automotive
- Biomedical
- Electronics
- Manufacturing
- Metal Production
- Mining
- Nuclear Power

Mining Engineering

Starting salaries for Mining Engineers can range from \$70,000-\$120,000 per year!

Mining Engineers have their pick of diverse career opportunities including:

- Blasting
- Computer Modeling
- Environmental Protection
- Mine Planning and Design
- Reclamation
- Rock Mechanics
- Safety and Health
- Technical Support Specialists
