Highlight:
Global Change and Sustainability Center

The Global Change and Sustainability Center originated as a faculty-driven initiative to bridge disciplinary silos and facilitate interdisciplinary research on dynamics and adaptation in ecological systems, climate systems, sustainability, and interrelated impacts between global changes and society. After Geology and Geophysics Professor, Dr. Brenda Bowen, became the Director of the GCSC in 2015, the College of Mines and Earth Sciences generously provided space for a GCSC office in FASB.

Did You Know?

U of U Facilities Management has taken another important step forward as a leader in energy and sustainability by signing a 25-year solar energy contract. The contract will deliver 20 MW of solar energy to campus over its lifespan, powering the university toward its commitment to carbon neutrality by 2050.

Opportunities - Seminars

SUST 6800 - GCSC Seminar

The GCSC seminar series presents some of the best researchers--from around campus and across the country--whose work sheds light on global change and sustainability. Seminars are open to all, and students who are enrolled in the Seminar course, SUST 6800, have additional opportunities to engage with the speakers. The series is in its twelfth year. Video recordings of seminars from Spring of 2015 to the most current seminar are available on Canvas for viewing by University students, faculty and staff. Visit https://environment.utah.edu/seminar-series/ for more information.
